## **DETAILED ACTION**

# Response to Arguments

1. Applicant's arguments filed 11/25/2005 have been fully considered but they are not persuasive.

Applicant argues that the prior art of record dose not embed the metadata, which includes metadata digest embedded in the media signal steganographically.

The Examiner disagrees. Downs et al disclose that the part digest values stored in METADATA SC (s) 620 BOM can be used for validating the record (column 25, lines 36-49).

As to steganographically embedding the metadata digest in media signal,

Steganography is the art and science of writing hidden messages in such a way that
no one apart from the intended recipient knows of the existence of the message. Down
et al in his system disclose a watermarking tool to hide data in the content 113 that
identifies the content owner, the processing data, and other relevant data (column 9,
lines 15-46).

Currently claims 6-11, 13-18, 20-23, 25-30 are pending.

#### DETAILED ACTION

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Downs et al.

As to claim 6, Downs et al disclose a method for processing meta data of a media signal comprising: providing metadata digest for the media signal, and embedding metadata, including the metadata digest (the cited reference discloses that the part digest values stored in METADATA SC (s) 620 BOM can be used for validating the record, corresponding to "metadata digest". Refer for example to column 25, lines 36-49 and Fig.6) steganographically in the media signal (Steganography is the art and science of writing hidden messages in such a way that no one apart from the intended recipient knows of the existence of the message. Down et al in his system disclose a watermarking tool to hide data in the content 113 that identifies the content owner, the processing data, and other relevant data. Refer for example to column 9, lines 15-46).

### Allowable Subject Matter

Claims 7- 11, 13-18, 20-23, 25-30 are allowable.

#### Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 09/840,018

Art Unit: 2623

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

### CONTACT INFORMATION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barry Choobin whose telephone number is 571-272-7447. The examiner can normally be reached on M-F 7:30 AM to 18:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, WU JINGGE can be reached on 571-272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
